Music & Ukulele

In Voice class, we will engage in healthy vocal techniques, posture, critical and creative thinking of music in its social, historical, and musical contexts, aural skills, and many more concepts. Singers will be exposed to songs and music from many different cultures. The first part of the course will include rehearsing repertoire that we will perform in the Chinese New Year Festival. I look forward to exploring our voices together in a fun, learning, and adventurous season.

The ukulele is beginner friendly and a great way to explore both music theory and aural skill training. Students can begin playing their favorite, popular tunes within a few weeks. In ukulele class, we will learn various chords for playing tunes and strumming patterns. Students will need to provide their own soprano ukulele which can be purchased at a local Guitar Center store, Sam Ash store, or online via Amazon. The first part of the ukulele course will focus on preparation for the Chinese New Year Festival. We look forward to making beautiful music strumming away on our ukulele this season.
